Under Construction

As part of Government Strategy to develop centres of excellence for cancer treatment the National Plan for Radiation Oncology (NPRO) involves the construction of a new facility in Beaumont Hospital.

The new building will include the following features;

- 4 No. Linear Accelerator Treatment Rooms
- 2 No. CT Simulator Rooms
- MRI Suite
- Brachytherapy Treatment Room

Ethos Engineering are working as part of the Design/Build team and have design responsibility for the mechanical and electrical services installations.

Apex Business Centre,
